

SC007 Health and Safety – Noise

Course Outline:

Noise is a prolonged injury that no one can approach until it actually affects ones hearing ability. This course is intended to inform participants on sound levels, preventive measures to control unwanted sound, measuring noise, understanding the human ear and share the awareness amongst fellow workers and other personnel the importance of early symptoms in order to address the difficulties at later stages

Who May Apply?

Any person whose work requires him/her to be directly exposed to higher than average levels of noise

Learning Objectives:

- Definition of noise
- Regulations
- The sound meter
- Measuring sound levels
- Hearing loss and stress
- FAQs

Course Structure:

3 hours of Theory

No Practical

Certification:

An attendance certificate will be given to all attendees.

This does not have an expiry date however we suggest that a refresher course is taken to keep up-to-date with any changes mainly regarding regulations and practical guidelines.
