

SC020 Health and Safety - Cherry Picker (Scissors Lift / Man Lift) Safe Operation

Course Outline:

The course will endeavor to explain 'best- practices' methods of such lifts. The theoretical aspects of this course are complimented by practical sessions during which basic operations are explained, with an emphasis on safe operation.

The course is intended for experienced or prospective lift drivers preferably with some experience in operating lifting equipment.

Who May Apply?

Workers

Supervisors

Anyone who operates such machinery

Contents:

- Safety First – General Safety Rules
- Factors to consider before starting work
- Factors to consider during execution
- Lift Structure
- Safety features and lock outs
- Routine inspections and maintenance
- Inspections by a competent person
- The capacity chart
- Risk Assessment and control
- Wire ropes – Care and Maintenance
- The operators responsibilities
- Case Studies

Course Duration:

12 hours:

3 sessions of 3 hours each on Theory

1 session of 3 hours as Practical

Certification:

An attendance certificate will be given to all attendees.

This does not have an expiry date however we suggest that a refresher course is taken to keep up-to-date with any changes mainly regarding regulations and practical guidelines.
